

CLC & Capstone

Career education is designed to help you think about and plan your future, giving you the tools to be flexible and adapt your plan as necessary. Your plan should include strategies to maintaining your physical and mental health, and being an active citizen and lifelong learner are two essential strategies to ensure you stay healthy!

In this last assignment of CLC, write a short reflection piece of approximately 400-500 words, explaining your commitment to being a lifelong learner, being an active citizen, and remaining connected to your community. Really think about how you will be engaged as you become an adult, don't just submit a checklist with your plans. Describe the values you are hoping to gain yourself, the value you are wanting to add to the lives of others, and most importantly why it is important.
