

# GROWING at Lake Trail Middle School

July 3, 2019

# Lake Trail Middle School Learning Plan

## 2018-2019

### Context

Our building is 62 years old and considered the lighthouse of our community despite suffering considerable ambiguity about purpose over the past 13 years. In 2017 our Board of Education decided to move students registered in grade six into our school creating a 6-9 grade configuration. The transition of our school was very successful, and the Board of Education voted to keep the 6-9 grade configuration for at least 2 more years. Of our 329 students, 179 are registered in grades 6 or 7, and 150 are registered in grades 8 and 9.

We serve a community that is very diverse. We are fortunate that 1/3 of our student population has indigenous heritage. A significant percentage of our community struggle to meet the basic needs of their children and themselves. Some of our parents are very highly educated, many are not: some are involved in the lives and schooling of their children, many are not. All our parents want what's best for their children.

Other key parts of our context have been staff turnover (only 4 teachers from September 2016 are still working at our school; however, only two are new to our school this year) and the fact that we are building a new school due to open in September 2021. We also recognize the value of contemporary research about learning and the impact it needs to have as we prepare our students for a dynamic world. We recognize that we are all learners, and this guides our work, practice, and approaches.

### Focus

How can we make each student's life better?

- We will increase the feelings of connectedness our students feel. This includes connectedness to our school and to what they are learning. Our goal is that by the end of the year each student will be able to identify two adults, at least one of them being a staff member of our school, that they know believe that they can and will be successful.
  - A significant subset of this is our strategy to reduce the feelings of bullying our students report.
- We will increase student learning in core areas (reading, writing, numeracy).
- We will increase each student's development of the Core Competencies.
- We will improve each student's Executive Functioning skills.

Through extensive consultation in the 2016-2017 school year with students, parents, and teachers and by looking at research and best practice examples, we developed a plan for the 2017-2018 school year to help us to be unique, valuable and attractive to our community. Drawing from this information and data collected throughout the past year (Health Canada's Canadian Student Tobacco Alcohol and Drugs Survey; Foundation Skills Assessment results organized by cohort; student, parent, and staff satisfaction surveys) our teachers and School Planning Council met and developed this focus for the school year. As we progressed through the school year we continued to collect feedback, data, and monitor our progress. In June, through consultation with our school community, we decided to continue the many initiatives we undertook and to keep our focus the same with some minor adjustments to our strategies.

July 3, 2019

## Learning and Action

In the spring of 2017 we decided that the best way to meet our diverse student needs is by having 7 divisions of 6/7 split classes and 6 divisions of 8/9 split classes. Each teacher had a teaching partner and between them they were responsible for the learning of the 43 – 54 students they serve. Structurally, their rooms are either beside or across from each other and the teaming teachers have the same prep-time twice a week. We decided to continue with that structure this year as it was very successful. We also decided that the students going into grades 7 and 9 would remain with their homeroom teachers.

In addition to the experience we gained and the work we have done related to meeting the needs of 11-14 year olds, our teachers have actively sought professional development to become more skilled at supporting children who have experienced trauma and to integrate the First Peoples Principles of Learning. Many teachers have also been working on continuous reporting to support student growth and development mindful of our school district's Guiding Parameters for Assessment. Work in these areas will continue this year.

1. **We will increase the feelings of connectedness our students feel.** This includes connectedness to our school and to what they are learning. Our goal is that by the end of the year each student will be able to identify two adults, at least one of them being a staff member of our school, that they know believe that they can and will be successful.
  - We will reduce the feelings of bullying many of our students report feeling.
    - Through direct teaching and modelling, we will help students understand and prevent bullying.
    - We will be vigilant and active in addressing any bullying we are aware of.
    - Work with student council to create programs/awareness supporting student safety.
  - We will increase the connections our students have to their different communities
2. **We will increase student learning in core areas (reading, writing, numeracy).**
  - All students will be assessed for their reading proficiency in September and strategies will be developed to address areas of concern.
3. **We will increase each student's development of the Core Competencies.**
  - Each student will have an electronic portfolio where they will report on their growth and development in each of the six Core Competencies.
4. **We will improve each student's Executive Functioning Skills.**
  - Our Learning Support Teachers will provide tools and in-service for our staff focusing on developing these skills in their students.

## Evidence

In order to assess our success, we plan to collect some base-line data through surveys, i.e. one in early October and one again in May. We will track participation rates of students in the many activities they will be offered. We will track our discipline rates, as we believe that as we improve our student's lives their behaviours will improve as well. We will track our attendance rates. Finally, we will use student self-assessment on the Core Competencies as a way to get feedback about how they are feeling about their own growth and development and about their time in our school.

July 3, 2019

1. We will increase the feelings of connectedness our students feel. This includes connectedness to our school and to what they are learning. Our goal is that by the end of the year each student will be able to identify two adults, at least one of them being a staff member of our school, that they know believe that they can and will be successful.
  - Attendance rates
  - Satisfaction survey
  - Participation rates in school events
  - Discipline Records
  - Cross-boundary requests
  - Retention rates
2. We will increase student learning in core areas (reading, writing, numeracy).
  - Demonstrated progress in each area by every child
  - Track completion of achievable goals
  - Observations of students taking pride in their work
3. We will increase each student’s development of the Core Competencies.
  - E-portfolios by the students
  - Discipline records and counsellor accesses
  - Tracking our “Gotcha!” program
4. We will improve each student’s Executive Functioning skills.
  - Self-assessments on different strands of Executive Functioning
  - Track individual growth/improvement in selected students

**Reflect:** How can we make each student’s life better?

Before we can reflect, we should summarize the different things throughout the year that we did to achieve our goal.

1. **We will increase the feelings of connectedness our students feel.** This includes connectedness to our school and to what they are learning. Our goal is that by the end of the year each student will be able to identify two adults, at least one of them being a staff member of our school, that they know believe that they can and will be successful.

Focus	Actions	Measures
Building Connections	Provide our Indigenous students with additional support from our ISW’s  Embed authentic Indigenous activities and mindsets into what we do  Target resources for our least engaged/connected students  Increase student involvement and participation in planning and organizing	Observations  Discussions with students  Gov’t surveys  # of referrals to admin/counsellors  Track Gotcha!

#### 4. Improve each child's Executive Functioning skills

<b>Focus</b>	<b>Examples</b>	<b>Measures</b>
Improve each child's Executive Functioning skills	<p>Take more time daily for organizing, planning, and follow-through – model and reinforce it</p> <p>Have school and/or grade-wide strategies that everyone uses – use direct teaching for all: do not assume</p> <p>Tickets for supplies – left over tickets for draw</p> <p>Set kids up ahead of time by getting all the excess stuff in the classroom.</p> <p>Use Do Mats (Haz Mat, Strat Plan, TBD)</p>	<p>Survey for self-reporting</p> <p>Self-assessment on different strands of EF – compare T1 students to T4 students in Lance's class</p> <p>Track progress</p> <p>Track individual growth/improvement in selected students</p> <p>Students in the Photography classes. At the beginning of the semester, students are</p>

	<p>Planning Mat with goals and using calendars</p> <p>Lance teaching as Exploratory for students in 6/7</p> <p>Use the student self report in Sept and June – put in e-portfolio</p> <p>Discrete instruction of skills to support EF</p> <p>Add Jana, Nicole, Justin, Joel, Jocelyn and Nicole to e-portfolios</p> <p>Tiered lessons</p> <p>Note-taking skills</p> <p>“Do Mats”</p> <p>Avoiding redundant redundancies</p> <p>Modelling organized behaviour</p> <p>Printed visual on door – ‘Do you have...’</p> <p>Use Gotcha! for targeted actions for a monthly draw (class and then put in for school wide)</p>	<p>given lessons on how, why and where to shoot photos. They are then told that they will have limited freedom and autonomy throughout the term, (except for critique, field trip and lesson days), as to how they spend their time in Photography. They are initially given explanations as to the expectations of shooting days, (autonomous motivation and production), and start out shooting by observation. As the class progresses students are encouraged to evolve their photographic understandings into construction of photos, rather than by chance and observation. This requires planning, props and setting up shoots with partners outside of class time etc. which all must be appropriately planned and considered beforehand for it to work properly.</p>
--	---	---

## Results

- 2 questionnaires were provided to the staff, sept 2018 and spring 2019
- 6 staff members completed the survey
- significant improvements were noted in classrooms where multiple EF strategies were part of classroom routine (improvements in scores from 28-36 points)
- little to no improvement in EF was noted in classrooms that did not use many class wide strategies (improvement in scores from 1-8 points)
- classrooms that were more successful had daily routine, explicit expectations and instructions, supported students with organization, lists and checklists, and seemed to focus on EF strategies that fit with their teaching style.

**Narrative:** While our Inquiry is clear and our strategies to guide our learning and actions are aligned, there are some other engines that are important to our learning community.

The Arts are important to our community and we will continue to increase student access to them (visual, musical, dramatic, creative, and technical).

Having hands-on and contextual learning is powerful and we are working to create as many opportunities for this to happen as possible.

We have the great fortune to be located beside a pristine forest with a salmon bearing stream running through it, in a community with many opportunities within walking distance. We strive to take advantage of our location to enhance student learning and improve environmental connections.

Service and citizenship are important parts of our work as they help us develop kind, caring youth.

We are constantly working to integrate the First Peoples Principles of Learning in our daily work, not only because we recognize the need to integrate Indigenous awareness and understanding into our work, but because the Principles are good practice.

Many in our school community have experienced trauma and our staff have committed to becoming more trauma aware and to continue our growth towards trauma informed practice.

This year we were committed to continuous reporting for all students as it supports greater student growth and development.

Finally, we used inquiry as a dominant pedagogy supporting our learning community. We recognize that we are all learners and inquiry is a cornerstone for learning. We used the Spirals of Inquiry to guide our professional inquiry and a variety of inquiry/design process models to guide our student inquiries.

Please do not hesitate to contact me if you have any questions, comments, or suggestions.

Respectfully submitted,

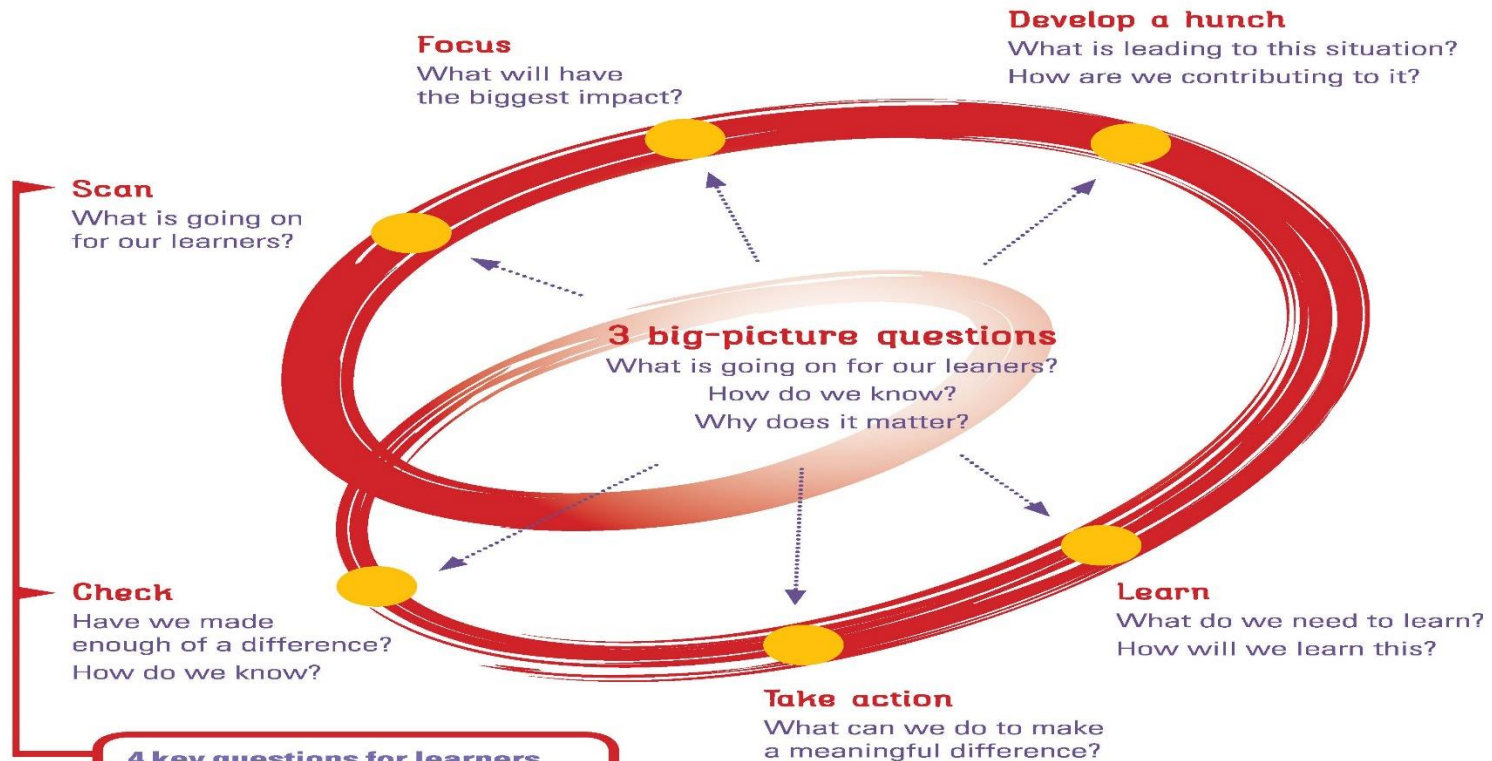

Gerald Fussell,

Principal,

Lake Trail Middle School.

July 3, 2019

# the spiral of inquiry

## 4 key questions for learners

Can you name two people in this setting who believe you will be a success in life?  
What are you learning and why is it important?  
How is it going with your learning?  
What are your next steps?

**Inquiry**  
is about being open to new learning  
and taking informed action.
