

Stew Savard Robotics/S.T.E.A.M. Leadership Award

Supplementary Application Questions:

1. Can you list the things you've done in high school that show you're a leader or that involve science, technology, engineering, art, or math (from grade 8 until now)?
2. Can you share a time when you were a leader during a robotics project or competition? What were your jobs, and how did you help your team solve problems?
3. How have you used what you know about robotics or STEAM to help or teach other students, either on your team or outside of it? How did this make a difference for the project or your team?
4. During robotics competitions, what choices or plans did you make as a leader? How did you handle the technical challenges while also helping your team work well together?
5. When you think about your time in robotics or STEAM, how did you grow as a leader or mentor? Was there a moment when you became better at leading your team?
