Bicycle Parts & Gear

Do you know what the parts of a bicycle are called?

What kind of gear do cyclists use?

Many bicycles have
gears to help riders go
up and down hills.

Bicycle seats come in many different sizes, shapes, and colours.

Bicycle wheels have
spokes.

The tires on a bicycle
are made of rubber just
like the tires on cars.

Push hard on the pedals
of your bicycle to go
really fast.

Use a bicycle lock to
keep your bicycle safe.

**Wear a helmet to keep
yourself safe!**
