CHECKED					
DRAWN	Dave Dalton	2024-07-22	SCALE 1:30	WEIGHT	SHEET 1/13

Note: Game components are not shown on this page for clarity of measurements of walls/floor components.

**Note: Snowfort platforms and starting zones are the same size on both sides of the court, and the same distance from the sides and back wall.

(Outside of court wall, inside back fence)

DRAWN	Dave Dalton	2024-07-22	SCALE 1:30
		WEIGHT	SHEET 2/13

Note: Each corner has the same number of components, located the same distances from the side and back wall.

Note: Measurements to the Snowmen and the Snowball Starting Areas are to the center of them. More detail on specifics of those items are found later in this document.

Note: Autonomous Zone measurements are on the next sheet for clarity.

Notes:

These snow blocks are constructed out of 2 layers of 1.5 inch thick rigid foam insulation (see materials list) glued together.

The dimensions are 3 inch x 3 inch x 3 inch and 3 inch x 3 inch x 6 inch.

There are a total of 8 small blocks and 4 large blocks per court side, for a total of 16 small blocks and 8 large blocks for the entire court setup.

Snow blocks will be covered in white duct tape such that:

Duct tape will be applied uniformly to each face of the block in a single layer.

Edges of the duct tape will be butted together and not overlap.

Duct tape that wraps around the edges will preserve the shape of the block.

NOTE: Snowman is constructed of 3 foam balls with a $\frac{1}{4}$ inch dowel through the middle.

NOTE: The snowman IS NOT attached to the plywood base. It is sitting on the plywood base.

NOTE: Bottom of the 5 inch diameter ball is cut to a flattened side

Snowman Wood Pieces			
Label	Dimensions (inches)	Material	# pieces
SB1	5.5 x 5.5	$\frac{3}{4}$ inch plywood	1 per snowman, 4 per full court
SB2	10	$\frac{1}{4}$ inch dowel	1 per snowman, 4 per court

C: Corners Detail

D: Mid-wall connections

Note: This is a diagram of only the exterior court walls.

All pieces are made from $\frac{3}{4}$ inch plywood.

Walls are constructed by layering 2 plywood pieces thick, resulting in a 1.5 inch thick wall.

ALL WALLS ARE 5.5 INCHES IN HEIGHT, CUT FROM $\frac{3}{4}$ INCH PLYWOOD.
