

**ADMINISTRATION/OPERATION OF NORTH ISLAND DISTANCE
EDUCATION SCHOOL**

Background

North Island Distance Education School (NIDES) is operated by the District and provides service to students in and beyond the boundaries of the District.

Procedures

1. In the delivery of its programs, the wide region that it serves and its internal operations, the District recognizes that NIDES has many differences from conventional schools. The District also recognizes that there are operational issues common to all distance education schools in the province and encourages and supports common operational development as long as such activity is within that allowed by normal District operation.
2. In addition to the above, financial reports regarding NIDES' operations shall be provided to the Secretary-Treasurer, included either as part of standard District-wide reporting or as a separate school. NIDES' operations will also comply with District procedures except when permission is given to waive certain procedures due to differing operational needs at NIDES. The Superintendent (education) or Secretary-Treasurer (financial) may give permission to alter administrative procedures.
