STUDENT TRAVEL

Background

The District recognizes and supports educational opportunities outside the school environment.

Student travel significantly contributes to student learning by:

- Developing and engaging a variety of learning styles
- Creating new relationships
- Promoting cultural and/or heritage development
- Honoring diversity of ability and perspective
- Reinforcing and/or extending conceptual understanding
- Promoting lifelong learning
- Providing learning experiences in alternate environments
- Offering a broad range of curricular and extra-curricular opportunities
- Providing opportunities that are not normally available to students.

Procedures

- 1. All student travel is optional and designed to enhance educational programs.
- 2. Any student not participating in a field trip must have an education program provided while classmates and teacher are away.
- 3. Successful learning experiences from student travel require a well-defined purpose, planning and organization.
- 4. Early planning and consultation with parents and staff is essential.
- 5. Travel opportunities, whether required or optional, support and extend student learning. Curricular alignment is desirable but not a restriction.
- 6. All trips are to be accessible to all students. School procedures will include inclusionary practices.
- 7. Cost must not be a barrier to involvement. The District and school shall have common procedures in communicating with parents, and shall be proactive in planning support.
- 8. Preference shall be given to student travel experiences that occur close to the Comox Valley. Long distance travel opportunities shall be limited and held to a higher level of accountability and scrutiny than travel on Vancouver Island and to the lower mainland.
- 9. Student safety is of paramount concern and is a determining factor in planning and implementation.

- 10. The District neither endorses nor supports international travel designed for vacation purposes.
- 11. The extra time and financial commitment being requested must be balanced by the educational benefits of the travel experience.
