

SNOW REMOVAL

Background

The School District recognizes its responsibility to maintain a safe environment on its schools' grounds. In recognition of that responsibility the School District has established procedures for snow removal in parking lots and on sidewalks around schools.

Procedures

1. When there is a significant snowfall (five centimeters or more of snow accumulation), the School District will assign staff and contract with a company to commence snow removal.
2. First priority for School District staff will be removing snow to enable safe access to and egress from school buildings.
3. Second priority will be removing snow from sidewalks adjacent to school property.
